

YaraVera[®] AMIDAS[™] Turf CR60 38-0-0

Guaranteed Analysis

Total Nitrogen (N)* 38%
34% Urea Nitrogen
4% Ammoniacal Nitrogen

Sulfur (S)* 4%
4% Combined Sulfur

Derived from: Polymer Coated Urea and Polymer Coated Ammonium Sulfate.

* The nitrogen and sulfur in this product have been coated to provide 38% controlled release nitrogen (N), and 4% controlled release sulfur (S).

There are no implied warranties of merchantability or fitness with respect to these products, nor are there any expressed warranties other than as may be contained in any guaranteed analysis that may accompany the product. Buyer assumes all risk to person and property in the use, handling or storage of the product. Seller's liability is limited to the full amount of the purchase price, with the waiver of any incidental or consequential damages being an expressed provision of this sale.

Suggestions for Use on Turf: For best product performance, always apply using best management practices for region and turf species. Apply only when turf is actively growing and with equipment that has been properly calibrated. Apply 0.5 – 3.5 pounds of product per 1,000 square feet. Apply irrigation directly after application for best results. Dry applications: 0.5 – 0.7 pounds nitrogen per 1,000 square feet. Spray applications: 0.10 – 0.2 pounds nitrogen per 1,000 square feet in a minimum spray volume of 30 gallons per acre for low rate (0.10 pounds nitrogen per 1,000 square feet) and 80 gallons per acre for high rate (0.2 pounds nitrogen per 1,000 square feet). It is important to note, that all products that are solubilized, should be screened before placing into spray tank.

Caution: Mineral fertilizers are inorganic salts or mixtures of salts. By their nature, fertilizer salts may be irritating to the skin and eyes. Precautions should be taken to prevent eye contact and minimize skin contact. Fertilizer dusts are considered nuisance-type dusts. Inhalation of nuisance dusts may induce or aggravate respiratory discomfort. Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

FIRST AID:

Eye Contact: Rinse with plenty of running water. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Inhalation: If inhaled, remove to fresh air. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact: Wash with soap and water. Get medical attention if irritation develops.

Ingestion: Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe.

Handle this product properly. To assure optimum quality and performance: use clean, dry and well maintained equipment.
