YaraVita[®] LAST N[™]

A concentrated nitrogen product formulated for foliar application

Guaranteed Analysis: Soluble in water

Total Nitrogen (N)	25% w/w
--------------------	---------

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

The need for nitrogen

Nitrogen is the most limiting nutrient in turf with a majority of nitrogen being applied as urea (46-0-0). Foliar nitrogen, such as YaraVita LAST N, is an excellent source of nitrogen for effectively delivering exactly what the plant needs through foliar applications.

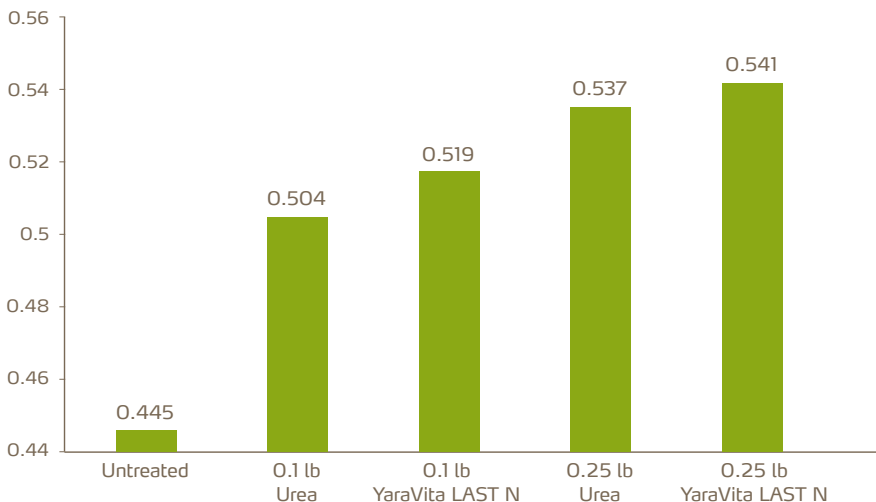

- Provides both immediately and slowly available N
- Great source for controlling excess growth through consistent release rate
- Sustained feeding for supplying consistent N to accommodate turf demands

Benefits

- 25% of nitrogen source as controlled release
- Formulated for rapid uptake and long term feeding
- Formulated to ensure rain fast
- Very crop safe at critical crop stages
- Proven reliable performance
- Easy to use liquid formulation
- Highly concentrated liquid reduces rates and handling time with less packaging waste
- Wide ranging tank mix profile: visit www.tankmix.com for details.

Average NDVI (All dates)

Treatments were applied at 0.1 lb. N/1000 ft² and .25 lb. N/1000 ft² bi-weekly.
