YaraVita[®] PROCOTE[®] Has You Covered

How exactly does YaraVita PROCOTE deliver more key nutrition to your crops than other micronutrient coatings?

Because YaraVita PROCOTE delivers B, Cu, Mn and Zn in a revolutionary oil-based coating that **increases feeding sites 30% on every single prill**. More feeding sites means more nutrient accessibility, and more nutrient accessibility leads to healthier crops, bigger yields and higher ROI.

Across all regions and all crops in the United States, YaraVita PROCOTE has proven time and again to boost ROI and improve yields.

Learn more about YaraVita PROCOTE's proven performance, including blend options, specific yield results and more to start maximizing your crop's potential.
