Directions For Use

For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply proper amounts of water ensuring the product remains in the area of active rooting. Use the higher label rates with surface and flood irrigation. Agitate before use.

Do not mix in concentrated form with any other tank additive without first adding water. Recommended mixing sequence: water, adjuvants, pesticides, YaraTera CANMIX Multi, other fertilizers then agitate. A standard jar test is recommended before tank mixing.
