*Mid Size*

*Polymer Coated Sulfur Coated Urea*

This turf fertilizer product provides slow-release Nitrogen. It consists primarily of urea encapsulated in a sulfur and polymer coating.

-Active Ingredients-	-Use-
This product is a fertilizer and does not contain any pesticide active ingredients.	<p>The use of drag chains and augers for material handling will greatly reduce the slow release nitrogen (SRN) rating. Each fertilizer plant is responsible for establishing the final SRN factor after blending.</p> <p>Applicators should limit spinner blade speeds to less than 600 RPM to reduce the fracture rate of particles.</p>
-Nutrient Contents-	
<p style="text-align: center;"><b>35-0-0</b></p> <p style="text-align: center;"><b>Guaranteed Analysis</b></p> <p>TOTAL NITROGEN (N).....35.00%*            35.00% Urea Nitrogen</p> <p>SULFUR (S)Total.....18.00%</p> <p>DERIVED FROM: Polymer Coated Sulfur Coated Urea.</p> <p><small>*For blends containing this product as the sole source of nitrogen, claims are typically set at 90% of the nitrogen value of this product, adjusted for proportion used in the fertilizer. Material handling, shipping and blending can affect the slow release quality of this material. Quality testing of the final blended product is recommended.</small></p>	<p style="text-align: center;"><b>Environmental Health &amp; Safety Considerations</b></p> <p>See product MSDS for further information on this product, or contact Turf Care Supply Corp.</p>
