

Knowledge grows

Don't Leave Phosphorus Behind.

Up to 90% of P applied is tied up prior to the crops accessing it.

YaraAmplix PROCOTE OPTIMIZE is a biostimulant fertilizer coating that protects the phosphorus you apply and liberates the phosphorus already in the soil.

PROCOTE fertilizer coatings give you the ability to provide **balanced nutrition** using your dry fertilizer as the delivery platform, with proven, high-performance biostimulants and micronutrients.
– no extra work for you.
