

Knowledge grows

Yara AMIPLUS LIQUID 2.0

What is AMIPLUS LIQUID 2.0?

- A Urease Inhibitor for fertiliser containing urea (including liquid UAN)
- Contains 25% w/w N-(n-Butyl)thiophosphoric triamide(NBPT)

How to use AMIPLUS LIQUID 2.0?

- Fill the sprayer tank with half the desired quantity of fertiliser
- Add the correct rate of AMIPLUS LIQUID 2.0 and mix thoroughly
- Continue agitation whilst adding the remaining quantity of fertiliser
- Apply the tank mix straight away

Liquid products

Liquid urea fertilisers with more than 1% urea applied any time from 1 April to 15 January each year must use effective protection to reduce ammonia emissions.

Unprotected liquid products may be applied from 1 April and the last application in autumn if:

- Agronomic justification is given by FACTS-qualified farm personnel
- Following FACTS-qualified advice specific to the crop

Safety considerations

Always wear suitable PPE when handling AMIPLUS LIQUID 2.0 - please refer to the MSDS for more information.

Recommended rates of use

Yara Product Name	Analysis % w/v		AMIPLUS LIQUID 2.0 Rate (lt/m3)
Yara Nuram 37	37% N		0.80
Yara Nuram 35 + S	35% N	7% SO ₃	0.70
Yara Nuram N32 + 9.4 SO ₃	32% N	9.4% SO ₃	0.65
Yara Nuram N30.3 + 10.8 SO ₃	30.3% N	10.8% SO ₃	0.60
Yara Nuram N29 + 11.9 SO ₃	29% N	11.9% SO ₃	0.55
Yara Nuram N25 + 14.3 SO ₃	25% N	14.3% SO ₃	0.45
Yara Nuram N19 + 19 SO ₃	19% N	19% SO ₃	0.30
