

YaraMila[®] MULTICROP[™]

10-24-24, 6.7% S

Delivering NPK +S in one prill- No segregation, no surprises, just predictable, profitable performance

YaraMila MULTICROP 10-24-24 is a homogeneous NPK +S compound fertilizer engineered for broad use across high-value crops, turf, fruits, vegetables, and general cropping systems. Each granule contains the full nutrient profile, ensuring consistent, uniform nutrition with every application.

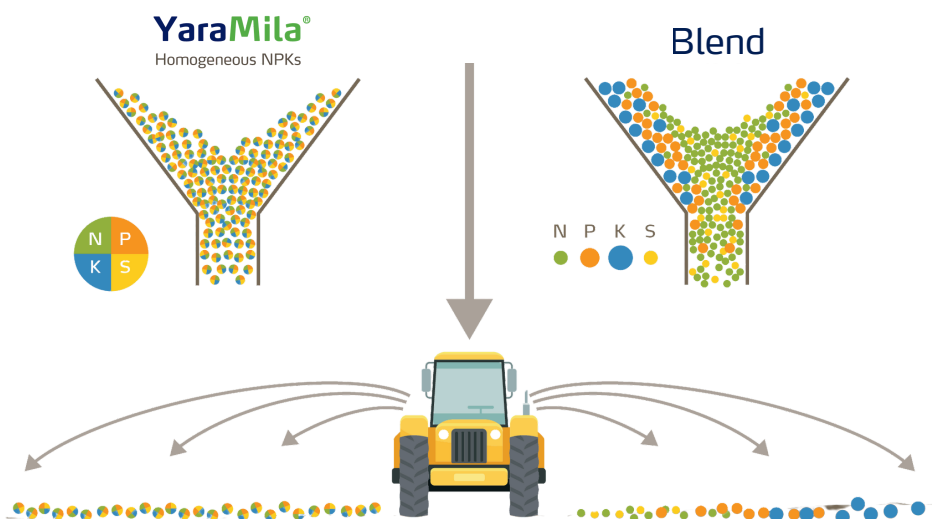

Benefits & Features:

- Homogeneous prills: Every granule contains N-P-K-S, meaning no segregation during transport or spreading.
- Fast & even dissolution supports consistent nutrient availability.
- Balanced macronutrient ratio especially suited for root development, fruiting, and crop quality.
- Sulfur-enriched for improved nitrogen uptake and enhanced flavor and quality in many crops.

Analysis

Nitrogen (N) 10%	Phosphorus (P ₂ O ₅) 24%	Potassium 24%	Sulfur 6.7%
8.8% Ammoniacal Nitrogen 1.2% Nitrate Nitrogen			

Derived from: Ammonium Sulphate, Ammonium Nitrate, Potassium Nitrate, Monoammonium Phosphate, Diammonium Phosphate and Potassium Chloride

Maximize crop yield and quality with YaraMila

With a combination of nitrogen (N), phosphorus (P) and potassium (K) – the most essential plant nutrients – YaraMila fertilizers help to maximize vegetable and fruit crop yield and quality. Each YaraMila formulation, whether in prill or granule form, is designed to meet specific crop requirements, and is among the most highly efficient sources of N, P and K available.

Some YaraMila formulations also contain secondary and micronutrients essential for specific crops.

Production Sizes:

Available in 50 lb bags and bulk

Target Crops

Ideal for fruits, vegetables, nuts, vineyards, turf & ornamentals

Application Method

Specifically designed to allow easy and accurate spreading by machine or by hand

YaraMila[®] MULTICROP[™]

10-24-24, 6.7% S

Delivering NPK +S in one prill-

No segregation, no surprises, just predictable, profitable performance

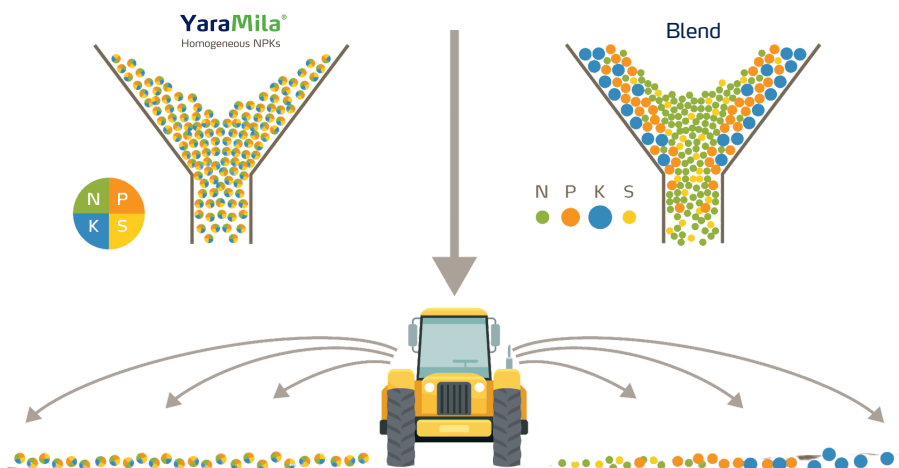

YaraMila MULTICROP 10-24-24 is a high-analysis, compound NPK + S fertilizer that delivers uniform nutrition to support strong root development, early vigor, and consistent yield potential, helping maximize return from the start. Each granule contains the full nutrient profile, ensuring consistent, uniform nutrition with every application.

Benefits :

- Higher yields driven by balanced nutrition
- Better fruit and vegetable quality
- More uniform stands and harvest consistency
- Reduced nutrient waste
- Improved profitability per acre

Analysis
