

YaraRega[®] FLEX 18-4-19

Guaranteed Analysis

Total Nitrogen (N)	18%
9.8% Ammoniacal Nitrogen	
8.2% Nitrate Nitrogen	
Available Phosphate (P ₂ O ₅)	4.0%
Soluble Potash (K ₂ O).....	19.0%
Sulfur (S)	6.0%
6.0% Combined Sulfur (S)	
Boron (B)	0.08%
Zinc (Zn).....	0.08%
0.08% Water Soluble Zinc (Zn)	

Derived from Ammonium Nitrate, Monoammonium Phosphate, Borax Pentahydrate, Zinc Sulfate Monohydrate, Potassium Sulfate

There are no implied warranties of merchantability or fitness with respect to these products, nor are there any expressed warranties other than as may be contained in any guaranteed analysis that may accompany the product. Buyer assumes all risk to person and property in the use, handling or storage of the product. Seller's liability is limited to the full amount of the purchase price, with the waiver of any incidental or consequential damages being an expressed provision of this sale.

Caution: Mineral fertilizers are inorganic salts or mixtures of salts. By their nature, fertilizer salts may be irritating to the skin and eyes. Precautions should be taken to prevent eye contact and minimize skin contact. Fertilizer dusts are considered nuisance-type dusts. Inhalation of nuisance dusts may induce or aggravate respiratory discomfort. Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Danger

Causes serious eye irritation.
May damage fertility or the unborn child.
Do not handle until all safety precautions have been read and understood.
Wear protective gloves/clothing and eye/face protection.
IF exposed or concerned: Get medical attention.

IF IN EYES:
Rinse cautiously with water for several minutes
Remove contact lenses, if present and easy to do. Continue rinsing.
Immediately call a POISON CENTER or doctor/physician.
Product forms slippery surface when combined with water.

YaraRega[®] FLEX

18-4-19

Maximize Growth and Plant Health:

Get a great start with YaraRega FLEX, a professional turf and landscape fertilizer that is a perfect choice for establishment or maintenance applications. YaraRega FLEX provides a range of both macro and micro nutrients in a perfect ratio to sustain proper growth and help mitigate stress for turf and ornamentals. YaraRega FLEX is perfect for spraying, spreading and fertigation applications. This product is a homogeneous NPK + S, Zn, B formulation that allows for consistent amounts of nutrition on each particle for preventing segregation, thus enhancing the consistency of spreading without noticeable striping and irregular growth patterns. Additionally, YaraRega FLEX is well suited for spoon-feeding and fertigation applications by easily solubilizing the product; this is perfect for providing the right amount of nutrition at the right time.

Suggestions for Use on Turf:

For best product performance, always apply using best management practices for region and turf species. Apply only when turf is actively growing and with equipment that has been properly calibrated. Apply .5 – 5.5 pounds of YaraRega FLEX per 1,000 square feet. Apply irrigation directly after application for best results.

Dry applications: .5 – 1 pounds nitrogen per 1,000 square feet.

Spray applications: 0.10 – 0.2 pounds nitrogen per 1,000 square feet in a minimum spray volume of 30 gallons per acre for low rate (.05 LBS. N/1000ft²) and 80 gallons per acre for high rate (0.2 LBS. N/1000ft²). It is important to note, that all products that are solubilized, should be screened before placing into spray tank.

FLORIDA RESIDENTS, PLEASE NOTE: Nitrogen shall not be applied at an application rate greater than 0.7 lbs. of readily available nitrogen per 1000 sq. ft. at any one time based on the soluble fraction of formulated fertilizer. Not more than 2 lbs. of total nitrogen per 1000 sq. ft. per application may be applied during the spring or summer. Not more than 1 lb. total nitrogen per 1000 sq. ft. per application may be applied during the fall or winter. No application of nitrogen in the winter months in North Florida.
