Get a great start with YaraRega NK GREEN, a professional turf and landscape fertilizer that is a perfect choice for establishment or maintenance applications. YaraRega NK GREEN provides a 2:1 ratio of nitrogen (N) to potassium (K) to sustain proper growth and help mitigate stress. This product is a homogeneous formulation and allows for consistent amounts of nitrogen and potassium on each particle for preventing nutrient segregation, thus enhancing the consistency of spreading without noticeable striping and irregular growth patterns. Additionally, YaraRega NK GREEN is well suited for spoon-feeding applications by easily solubilizing the product; this is perfect for providing the right amount of nutrition at the right time.

Suggestions for Use on Turf:

For best product performance, always apply using best management practices for region and turf species. Apply only when turf is actively growing and with equipment that has been properly calibrated. Apply 0.5 – 3.5 pounds of YaraRega NK GREEN per 1,000 square feet. Apply irrigation directly after application for best results.
Dry applications: 0.5 – 0.7 pounds nitrogen per 1,000 square feet.
Spray applications: 0.10 – 0.2 pounds nitrogen per 1,000 square feet in a minimum spray volume of 30 gallons per acre for low rate (0.10 pounds nitrogen per 1,000 square feet) and 80 gallons per acre for high rate (0.2 pounds nitrogen per 1,000 square feet). It is important to note, that all products that are solubilized, should be screened before placing into spray tank.

Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

There are no implied warranties of merchantability or fitness with respect to these products, nor are there any expressed warranties other than as may be contained in any guaranteed analysis that may accompany the product. Buyer assumes all risk to person and property in the use, handling or storage of the product. Seller's liability is limited to the full amount of the purchase price, with the waiver of any incidental or consequential damages being an expressed provision of this sale.

Caution: Mineral fertilizers are inorganic salts or mixtures of salts. By their nature, fertilizer salts may be irritating to the skin and eyes. Precautions should be taken to prevent eye contact and minimize skin contact. Fertilizer dusts are considered nuisance-type dusts. Inhalation of nuisance dusts may induce or aggravate respiratory discomfort. Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
