

YaraRega[®] NK GREEN 22-0-12

Guaranteed Analysis:

Total Nitrogen (N) 22.0%
 10.5% Ammoniacal Nitrogen
 11.5% Nitrate Nitrogen
 Soluble Potash (K₂O) 12.0%

Derived from Ammonium Nitrate and Potassium Chloride.
 Chlorine (Cl) Maximum 9.5%

There are no implied warranties of merchantability or fitness with respect to these products, nor are there any expressed warranties other than as may be contained in any guaranteed analysis that may accompany the product. Buyer assumes all risk to person and property in the use, handling or storage of the product. Seller's liability is limited to the full amount of the purchase price, with the waiver of any incidental or consequential damages being an expressed provision of this sale.

Caution: Mineral fertilizers are inorganic salts or mixtures of salts. By their nature, fertilizer salts may be irritating to the skin and eyes. Precautions should be taken to prevent eye contact and minimize skin contact. Fertilizer dusts are considered nuisance-type dusts. Inhalation of nuisance dusts may induce or aggravate respiratory discomfort. Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

WARNING

Causes serious eye irritation. Wear eye protection.
 Wash hands thoroughly after handling.
 IF IN EYES: Rinse cautiously with water for several minutes.
 Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
 Product forms slippery surface when combined with water.

HANDLE THIS PRODUCT PROPERLY. TO ASSURE OPTIMUM QUALITY AND PERFORMANCE: USE CLEAN, DRY AND WELL MAINTAINED EQUIPMENT.

YaraRega[®] NK GREEN 22-0-12

Maximize Growth and Plant Health:

Get a great start with YaraRega NK GREEN, a professional turf and landscape fertilizer that is a perfect choice for establishment or maintenance applications. YaraRega NK GREEN provides a 2:1 ratio of nitrogen (N) to potassium (K) to sustain proper growth and help mitigate stress. This product is a homogeneous formulation and allows for consistent amounts of nitrogen and potassium on each particle for preventing nutrient segregation, thus enhancing the consistency of spreading without noticeable striping and irregular growth patterns. Additionally, YaraRega NK GREEN is well suited for spoon-feeding applications by easily solubilizing the product; this is perfect for providing the right amount of nutrition at the right time.

Suggestions for Use on Turf:

For best product performance, always apply using best management practices for region and turf species. Apply only when turf is actively growing and with equipment that has been properly calibrated. Apply 0.5 – 5 pounds of YaraRega NK GREEN per 1,000 square feet. Apply irrigation directly after application for best results.

Dry applications: .5 – 1 pounds nitrogen per 1,000 square feet.

Spray applications: 0.10 – 0.2 pounds nitrogen per 1,000 square feet in a minimum spray volume of 30 gallons per acre for low rate (.10 LBS. N/1000ft²) and 80 gallons per acre for high rate (0.2 LBS. N/1000ft²). It is important to note, that all products that are solubilized, should be screened before placing into spray tank.

NOTE: Apply only to actively growing turf. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn or other turf area, and sweep away any product that lands in the driveway, sidewalk, or street, back onto your lawns. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

FLORIDA RESIDENTS, PLEASE NOTE: Nitrogen shall not be applied at an application rate greater than 0.7 lbs. of readily available nitrogen per 1000 sq. ft. at any one time based on the soluble fraction of formulated fertilizer. Not more than 2 lbs. of total nitrogen per 1000 sq. ft. per application may be applied during the spring or summer. Not more than 1 lb. total nitrogen per 1000 sq. ft. per application may be applied during the fall or winter. No application of nitrogen in the winter months in North Florida.
