YaraVita[®] PROCOTE[™] B

Oil-based suspension concentrate with boron for fertilizer coating.

Typical Analysis:	
Boron (B)	7.1% (nutrient content per gallon = 13 oz)
Appearance	Blue oil-based suspension concentrate
Solubility	Insoluble in water
Typical pH	7-8
Typical Density	189 oz per gallon
Freezing Point	< 18°F
Viscosity	1700 - 2700 cps at 68°F

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

Boron is an essential Nutrient for Alfalfa, which removes significant amounts of B from the soil. Applications after first cutting can be beneficial to yields. Don't forget YaraVita Procote B before applying dry blends

Delivered to retailers as liquid coating

Delivered to growers already coated onto the fertilizer so that the micronutrients are evenly distributed.

Benefits

- Greener, leafier plants with higher protein
- Quicker regrowth after cutting
- Extended stand life
- Improved winter hardiness
- Increased root growth
- Better water use, efficiency, and drought tolerance
- Increased root nodule development for fixing nitrogen
- Denser stands to suppress weed and grass growth
