YaraLiva[®]

Calcium Nitrate

GROW MORE. EMIT LESS.

Looking to farm smarter and more resource-efficient? YaraLiva[®] Calcium Nitrate fertilizers are designed to help you do just that.

Thanks to Yara's innovative and proprietary process, YaraLiva fertilizers are produced with a carbon footprint that is up to 70% lower than other fertilizers. That's because we've engineered a cleaner way to make nitrate-based fertilizers, preventing the release of nitrous oxide, a potent greenhouse gas.

The result? Your crop gets **high-quality nutrition**, you add **value to your crop**, and take a big step forward in agriculture stewardship.

Why it matters:

- ✓ Up to 4x lower emissions than older methods
- ✓ Supports your farm's sustainability goals
- ✓ Backed by the 4R Nutrient Stewardship principles

Let's partner to grow better.
